DETAILED ACTION

1. Claims 34-41, 46, and 48 are pending. Claims 34, 38, 40, 46, and 48 have been amended in this communication filed 10/01/09 entered as Response After Non-Final Action.
2. The Claim objections have been overcome by Applicants' amendment to the claims and are hereby withdrawn.
3. The 35 USC 112, Second Paragraph Rejections for claims 34, 40, and 46 have been overcome by Applicants' amendments and are hereby withdrawn.
4. The 35 USC 101 Rejection for claim 48 has been overcome by Applicants' amendment to claim 48 and is hereby withdrawn.

Allowable Subject Matter

Claims 34-41, 46, and 48 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art (US 5,778,400) Tateno discloses an SGML-based document with tags where some tags may be omitted which is designated by the DTD (Document Type Definition). Tateno did not disclose removing predefined element tags from the original analyzed structured document and concatenating character strings of elements made adjacent in the original analyzed structured document by removal of the predefined element tags to generate a structured document for a full-text search including the concatenated content character strings omitting the removed predefined element tags and generating information for restoring the predefined element tags.

Hesse et al. (US 5,185,698) discloses organizing a structured document hierarchically written in Standardized General Markup Language (SGML) with an element consisting of a begin tag associated with the content and may optionally include an end tag. Hesse et al. did not disclose removing predefined element tags from the original analyzed structured document and concatenating character strings of elements made adjacent in the original analyzed structured document by removal of the predefined element tags to generate a structured document for a full-text search including the concatenated content character strings omitting the removed predefined element tags and generating information for restoring the predefined element tags.

Other Relevant Prior Art

Sato et al. (US 6,014,690); Chang (US 5,694,594); Kuga et al. (US 5,276,616); Shafer (US 5,583,764); R.W. Matzeni, K. M. George; and G.E. Hedrick; "A model for studying ambiguity in SGML Element Declarations"; Stribling, Dee; Hunter, Tim; Olszewski, Len; Corrigan, Anne; Mullis, Randy; and Allen, Lloyd, "A Real World Conversion to SGML"; Yang, Yiming, "Using Corpus Statistics to Remove Redundant Words in Text Categorization"; Zheng, Min, "Text-Hypertext Mutual Conversion and Hypertext Interchange through SGML; Clarke, Charles L.A. and Cormack, Gordon V., "On the Use of Regular Expressions for Searching Text".

Steven R. Newcomb; "Multimedia Interchange Using SGML/HyTime, Part 1: Structures"; Peter Goldie; "Using SGML to create complex interactive documents for electronic publishing, commentary"; Donald D. Chamberlin, Helmut F. Hasselmeier; Allen W. Luniewski; Dieter P. Paris; Bradford W. Wade; and Mitch L. Zolliker; "Quill: An

Extensible System for Editing Documents of Mixed Type"; Jamie Haycox; "Standard Generalized Markup Language (SGML) as a basis for intelligent Data Management System".

An extensive search was performed and no better prior art was found.

For these reasons claims 34, 46, and 48 are deemed allowable over the prior art of record and claims 35-41 are allowed by dependency.

It appears that the instant invention is beyond the skill of one of ordinary art. Accordingly the invention would NOT have been obvious because one of ordinary skill could not have been expected to achieve it. NOR would they have been able to predict the results, and as such, they would have not capability of expecting success.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
